

# 01141 COMPLEX ANALYSIS 2005

## Short Dictionary

Translation from English to Danish

### A

- Absolute value = absolut værdi, 8
- Absolute convergence = absolut konvergens, 237
- Accumulation point = akkumulations-punkt, 43
- Analytic continuation = analytisk fortsættelse, 292
- Analytic function = analytisk funktion, 70
- Antiderivative = stamfunktion, 173
- Arc = kurve uden selvgennemskæringer, 150
- Argument = argument, 17
- Arctic circle = (nordlig) polarcirkel, 45

### B

- Bijjective = bijektiv
- Bilinear transformation = bilineær transformation, 389
- Binomial formula = binomial formel, 6, 250
- Boundary = rand, 42
- Bounded set = begrænset mængde, 42
- Branch = gren, 122, 132
- Branch of argument = gren af argument, 18
- Branch of logarithm = gren af logaritme, 119
- Branch, principal = hovedgren, 18, 119
- Branch cut = forgreningssnit, 18, 119
- Branch point = forgreningspunkt, 122

### C

- Cauchy criterion = Cauchy kriterium, 262
- Cauchy estimates = Cauchy vurderinger, 214, 215
- Cauchy product = Cauchy produkt, 247
- Cauchy sequence = Cauchy følge, 262
- Cauchy series = Cauchy række, 263
- Cauchy's integral formula = Cauchy's integralformel, 204, 210, 211
- Cauchy's integral theorem = Cauchy's integralsætning, 187, 194
- Cauchy-Riemann equations = Cauchy-Riemann ligningerne, 73
- Chain rule = kæderegel, 69
- Chordal distance = kordeafstand, 49
- Circle of convergence = konvergenscirkel, 253
- Closed contour = lukket kontur, lukket kurve, 157
- Closed disk (set) = afsluttet cirkelskive (mængde), 42
- Compact = kompakt, 42
- Comparison test = sammenligningskriterium, 236
- Complex conjugate = kompleks konjugeret, 10

Complex number = komplekst tal, 3  
 Complex plane = kompleks plan, 8  
 Complex plane, extended = udvidet kompleks plan, 288  
 Conformal = konform, 378  
 Conjugate = konjugeret, 10  
 Connected set = sammenhængende mængde, 40, 44  
 Contour = kontur, kurve, 154  
 Contour, integral along = kurveintegral, 162, 167  
 Contour, length of = længde af kurve, 159  
 Convergence = konvergens, 58  
 Convergence, Cauchy criterion for = Cauchy kriteriet for konvergens, 262  
 Convergence, absolute = absolut konvergens, 237  
 Convergence, pointwise = punktvis konvergens, 238  
 Convergence, uniform = uniform eller ligelig konvergens, 238  
 Cross-ratio = dobbeltforhold, 397  
 Curve = kurve, 149

## D

De Moivre's formula = De Moivre's formel, 29  
 Deformation invariance theorem = deformations-sætningen, 186  
 Deformation of contours = deformation af konturer (eller kurver), 182  
 Denominator = nævner  
 Derivative = afledet, 67  
 Differentiability = differentiability, 67  
 Differential equation = differentiaalligning, 67  
 Differential equation, power series = potensrækker og differentiaalligning, 258  
 Distance = afstand, 9  
 Directed smooth arc = orienteret glat kurve uden selvgenemskeer, 152  
 Dirichlet problem = Dirichlet problem, 222  
 Dirichlet problem for unit disk = Dirichlet problem for enheds cirkelskiven, 224  
 Disk = cirkelskive  
 Domain = område, domæne, 40  
 Domain of analyticity = analyticitetsområde  
 Domain of conformality = område hvor funktionen er konform, 378  
 Domain of definition = definitionsområde, 53

## E

Entire function = hel funktion, 70  
 Equipotential = ækvipotential, 81  
 Essential singularity = væsentlig singularitet, 279, 282  
 Essential singularity at infinity = væsentlig singularitet i uendelig, 288  
 Euler's equation = Euler's ligning, 27  
 Exponential function = eksponential funktion, 27, 111  
 Extended complex plane = udvidet kompleks plan, 48, 288

## F

- Fibonacci sequence = Fibonacci følge, 268
- Fixed point = fikspunkt, 92
- Focus, focal point = brændpunkt
- Fractals = fraktaler, 93
- Fundamental region = fundamentalmængde (eller område), 112
- Fundamental theorem of algebra = algebraens fundamentalsætning, 101, 216, 362
- Fundamental theorem of calculus = integralregningens fundamentalsætning, 161

## G

- Generalized Cauchy integral formula = generaliseret Cauchy integralformel, 210, 211
- Generalized circle = generaliseret cirkel, 388
- Geometric series = kvotientrække, 236
- Great circle = storcirkel, 50
- Green's theorem = Green's sætning, 192

## H

- Harmonic conjugate = harmonisk konjugeret, 80
- Harmonic function = harmonisk funktion, 79, 221
- Holomorphic function = holomorf funktion, 70
- Hyperbolic functions = hyperbolske funktioner, 114

## I

- Image = billede, 53
- Imaginary axis = imaginær akse, 8
- Improper integrals = uegentlige integraler, 337
- Independence of path = uafhængighed af vejen, 173
- Infinity (point at) = uendelig (punkt i), 288
- Initial point = begyndelsespunkt, 173
- Integral = integral, 162
- Integral, bounds for = grænser for integral, 169
- Integral, contour = kurveintegral, 167
- Integration by parts = partiel (eller delvis) integration, 179
- Interior point = indre punkt, 39
- Inverse trigonometric functions = inverse trigonometriske funktioner, 134
- Inversion = inversion, 55, 387
- Isolated singularity = isoleret singularitet, 277
- Isotherms = isotermer, 81, 419

## J

- Jacobian = Jacobiant, 78
- Jordan curve theorem = Jordan's kurvesætning, 158
- Joukowski, 57, 438
- Julia set = Julia mængde, 92

## L

- L'Hôpital's rule = L'Hôpital's regel, 72, 261
- Laplace's equation = Laplace's ligning, 79, 221, 369

Laurent series = Laurent række, 269  
Leibniz's formula = Leibniz's formel, 248  
Level curve = niveau kurve, 81  
Limit = grænse, 58  
Linear transformation = lineær transformation, 57, 385  
Liouville's theorem = Liouville's sætning, 215, 226  
Logarithm = logaritme, 118  
Loop = løkke, 157

## M

Maclaurin form = Maclaurin form, 103  
Maclaurin series = Maclaurin række, 242,  
Magnification = skalering, 57, 385  
Mandelbrot set = Mandelbrot mængden, 93  
Mapping = afbildning, 53  
Maximum modulus principle = maksimum modulus princip, 217  
Maximum principle = maksimum princip, 222  
Mean-value property = middelværdi egenskab, 226  
Meromorphic = meromorf, 355  
Minimum modulus principle = minimum modulus princip, 220  
Minimum principle = minimum princip, 222  
Möbius transformation = Möbius transformation, 389, 396, A-19  
Modulus = modulus, 8  
Multiple-valued = flertydig, 118  
M-test = Weierstrass majorant kriterium, 263

## N

Neighborhood = omegn, 39  
Numerator = tæller

## O

One-to-one function = en-til-en eller en-entydig funktion, 111  
Open disk (set) = åben cirkelskive (mængde), 39  
Open mapping property = åben afbildningsegenskab, 363  
Orbit = bane, 91  
Order relation = ordnings relation, 7

## P

Parametrization = parametrisering, 149, 154  
Partial fraction decomposition = dekomponering i stambrøker, 105  
Partial fractions = stambrøker, 105  
Partial sum = afsnit, 235  
Picard's theorem = Picard's sætning, 282  
Piecewise smooth curve = stykkevis glat kurve, 157  
Pointwise convergence = punktvis konvergens, 238  
Polar form = polær form, 18  
Pole = pol, 104, 279

Pole of order  $m$  (or multiplicity) = pol af orden  $m$  (eller multiplicitet), 104, 279  
 Polygonal path = polygonal sti (eller vej), 39  
 Polynomial = polynomium, 61  
 Polynomials = polynomier, 99  
 Potential = potential, 200  
 Power series = potensrække, 252  
 Primitive  $m$ th root of unity = primitiv  $m$ -te enhedsrod, 34  
 Principal branch = hovedgren, 119  
 Principal value of argument = hoverværdi af argument, 18  
 Principal value of logarithm = hovedværdi af logaritme, 119  
 Principal value of integral = hovedværdi af integral, 319  
 Pure imaginary number = rent imaginært tal, 4

## Q

Quadratic formula = løsningsformel til rødder i kvadratisk polynomium, 36

## R

Radius of convergence = konvergensradius, 253  
 Range = værdimængde, 53  
 Ratio test = kvotientkriterium, 237  
 Rational function = rational funktion, 62, 99  
 Real axis = reel akse, 8  
 Regular = regulær, 70  
 Removable discontinuity = hævelig diskontinuitet, 62  
 Removable singularity = hævelig singularitet, 279  
 Residue = residuum eller residue, 109, 308  
 Residue theorem = residue sætning, 312  
 Resistance = modstand, 139  
 Riemann hypothesis = Riemann hypotesen, 268  
 Riemann mapping theorem = Riemann's afbildningssætning, 380  
 Riemann sphere = Riemann-kuglen, 45  
 Riemann sum = Riemann sum, 162  
 Riemann zeta function = Riemann's zeta funktion, 268  
 Roots of unity = enhedsrødder, 34  
 Rotation = rotation, 57, 384

## S

Schwarz-Christoffel transformations = Schwarz-Christoffel transformationer, 407  
 Sequence = følge, 235  
 Series = uendelig række, række, 235  
 Simple pole = simpel pol, pol af orden 1, 280  
 Simple zero = simpelt nulpunkt, nulpunkt af orden 1, 278  
 Simply connected domain = enkeltssammenhængende område, 184, 193  
 Single-valued = entydig (ikke at forveksle med one-to-one = en-entydig), 118  
 Singular part = singular del, 107  
 Singularity = singularitet, 278, 279

- Singularity, essential = væsentlig singularitet, 279
- Singularity, pole = pol, 279
- Singularity, removable = hævelig, 279
- Slit plane = opskåret plan
- Smooth arc = glat (eller regulær) kurve uden selvgenemsækering, 150
- Smooth closed curves = glatte (eller regulære) lukkede kurver uden selvgenemsækering, 150
- Streographic projection = stereografisk projektion, 44
- Strip = strimmel
- T**
  - Taylor form = Taylor form, 103
  - Taylor series = Taylor række, 242
  - Terminal point = endepunkt, 173
  - Translation = translation, parallelforskydning, 57, 384
  - Triangle inequality = trekantsulighed
  - Trigonometric functions = trigonometriske funktioner, 113, 114
  - Tropic of Cancer = (Krebsens) vendekreds, 45
- U**
  - Uniform convergens = uniform eller ligelig konvergens, 238, 239
- W**
  - Washer = pakning, 125
  - Wedge = kile, 126
  - Weierstrass M-test = Weierstrass majorant kriterium, 263
- Z**
  - Zero of order  $m$  = nulpunkt af orden  $m$ , 277
